(1) This is a target and may not be achieved. (2) As at the 30 September 2025 the RBA Cash Rate was 360 bps p.a. (3) Past performance is not a reliable indicator of future performance. (4) The payment of monthly cash income is a goal of MDIF only and neither the Manager nor the Responsible Entity provide any representation or warranty (either express or implied) in relation to the payment of any cash income. (5) Fund inception was 1 July 2020. (6) The fees and costs disclosed in this document may differ from those set out in the most recent ASX announcements. This is because they reflect actual amounts incurred during the relevant reporting period. These updated fees and costs are intended to provide a more accurate reflection of the actual expenses borne by the fund or its members during the relevant period. You should consider both this document and the PDS when assessing the fees and costs associated with your investment. (7) Returns and distributions are based on NAV unit price, after taking into account all fees and costs. Returns are annualised if over one year. Returns over 1 month are compounded monthly. No allowance has been made for entry fees, expenses or taxation. Target Return: RBA Cash Rate plus 3.25% p.a. monthly. YTD returns are not compounded.

Market Update

The global economic outlook improved slightly in the quarter, but uncertainty still lingers.

Australia's growth remains below-trend but is steadily lifting. Inflation is contained and interest rates are falling, while the labour market remains strong. Bond issuance remains hampered by market volatility, which continues to support bank and non-bank corporate lending.

The syndicated loan market remains competitive. Strong local and offshore demand is keeping liquidity deep, spreads tight and longer tenures on offer. Activity continues to be underpinned by refinancing and event-driven deals.

Momentum in corporate lending continues to build. While the volume of loans closed in the quarter is down on last quarter, some larger loans in the resources, tech and financial services sector has seen the value of loans grow strongly. M&A is increasing with further interest rate cuts and pent up demand is expected to see this trend continue. Competition for loans is keeping pressure on spreads and seeing a softening of terms

Commercial real estate lending demand is strong. Lower interest rates and still strong population growth is supporting activity. Undersupplied housing markets remain a key driver of development and high density projects in particular as construction cost pressures ease.

Fund Update^{3,7,8,14}

The Fund returned 2.00% (net) over the September 2025 quarter and 8.35% over the last twelve-months. To September 2025, the Fund has achieved a 1-year net return spread over the RBA Cash Rate of 4.20% p.a. and 5.30% p.a. since inception.

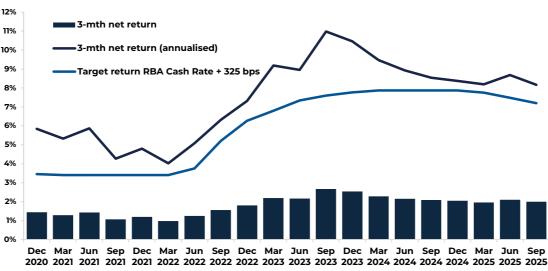

After increasing origination activities through the first half of 2025, MDIF (via its investment in the Wholesale Funds) has benefitted from being fully invested in a highly diversified portfolio of loans. The 27 new investments in Q3 effectively offset the 30 repaid loans, with MDIF holding 345 exposures at quarter-end. Overall, this quarter demonstrated a positive balance between asset liquidity and capital deployment.

Whilst Metrics is seeing an increasingly broad mix of lending opportunities, pricing and terms in the Corporate and Sponsored/Leveraged segments remain challenging and as a result new investment was loans more towards Commercial Real Estate (CRE), with 19 new CRE loans provided, along with 3 Corporate, 2 Fund Finance and 3 Leveraged.

Exited loans were similarly more towards CRE (17), which limited the overall impact on the Fund's sector positioning.

The portfolio maintained a largely consistent profile, being ~99% in senior ranking loans and ~98% in floating rate loans.

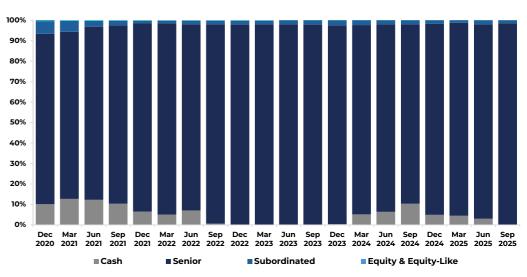

On a net basis, Fund returns were 2.00% over the quarter, down from 2.10% last quarter, noting the RBA Cash Rate cut of 25 basis points (bps) occurred, however other key portfolio investment settings of the Fund remained largely unchanged. The Fund has continued to outperform its hurdle return of the RBA Cash Rate² plus 325 bps through the cycle¹, which it has done since inception in July 2020.

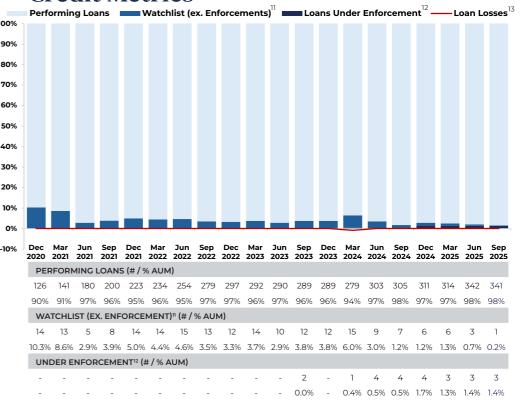

The Fund's loan portfolio was c.48% investment-grade rated at quarter end, consistent with the historical range. Most loans are individually around the middle of the credit risk spectrum (BBB to BB rated) with the portfolio weighted average credit rating slightly investment grade as it has been since inception.

Portfolio Composition^{8,9}

The Fund is predominantly exposed to senior secured loans meaning shareholder equity, unsecured creditors and subordinated debt ranks behind the Fund in a borrowers capital structure. While credit quality is also very important, position in the capital structure is typically an important protection for lenders. Whilst the Fund may make subordinated loans from time to time, the Fund will continue to maintain its senior ranking profile.

(8) MDIF invests indirectly (via its investments in MCP Wholesale Investments Trust (WIT) and Metrics Master Income Trust (MXT)) in Metrics Credit Partners Diversified Australian Senior Loan Fund, MCP Secured Private Debt Fund II and MCP Real Estate Debt Fund (Wholesale Funds) which engage in direct lending activities. Figures (other than NAV) are based on underlying Wholesale Fund activities. (II) Represents loans in respect of which the applicable lender has completed a restructuring by way of enforcement or agreement with the existing equity owners which resulted in the applicable lender's exit from the loan asset. (I3) Realised credit losses where recovery was less than invested capital. (20) Leverage Ratio (Net Debt/EBITDA) applies to Corporate loans based on most recent certificate provided by the applicable borrower setting out compliance with financial covenants, Loan to Value Ratio (LTV) applies to loans based by CRE and are calculated based on an independent valuation using either an 'on completion' market value for assets under construction or an 'as-is' value for assets not under construction. For certain CRE loans which are providing funding for only a limited scope on the 'as-is' valuation plus construction costs expended as verified by an independent certifier. (21) Calculated as the interest amount overdue divided by AUM. (22) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also ranks loans under a 1-5 scale of risk. These rankings are defined as follows: 1 - Loans performing but with a bigher likelihood of near-term issues in the next 6 months, 4 - Loans with an active covenant breach, payment default, or other significant issues negatively impacting the borrower's ability to service its debt obligations across the capital stack, 5 - Loans that are non-performing or in a distressed state with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. Any loan ranked as a 4

The Metrics Credit Partners Diversified Australian Senior Loan Fund (**DASLF**) is an open-ended unit trust registered with ASIC as a managed investment scheme. It invests in a diversified portfolio of primarily Australian corporate loans and other associated debt instruments, designed to broadly reflect the Australian corporate loan market. DASLF offers investors direct exposure to Australia's bank dominated corporate loan market by investing in bilateral, club-style and syndicated loans and other debt assets provided to Australian public and private companies and projects. Net income is distributed monthly¹. DASLF seeks to deliver a return of the benchmark (Bank Bills/BBSW 90 days) plus credit margin (+275-325 bps p.a. net)² while adhering to fund parameters. DASLF has an Issuer Rating of A- from S&P. Inception of the Fund was June 2013.

(1) The payment of monthly cash income is a goal of the Fund only and neither the Manager nor the Trustee provide any representation or warranty (either express or implied) in relation to the payment of any income. (2) This is a target and may not be achieved. (3) Past performance is not a reliable indicator of future performance. (4) Returns (Net and Distribution Returns) are based on NAV unit price. Returns over 1 month are compounded monthly, inception June 2013. Returns are post all Investment Management Fees, expenses and GST. Returns do not incorporate fee rebates and as such actual individual investor returns will differ from fund returns. Returns are not compounded.

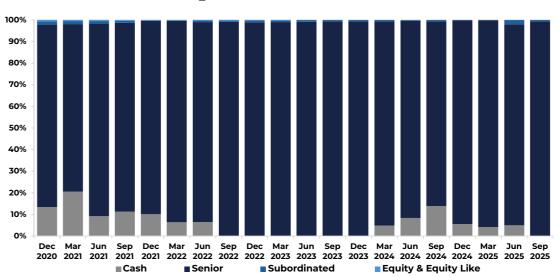

On a net basis, Fund returns were 1.90% over the quarter, against a benchmark (3M BBSW) return of 0.92%, noting the RBA Cash Rate cut of 25 basis points (bps) occurred however other key portfolio investment settings of the Fund remained unchanged. The Fund has continued to outperform its hurdle return of the Bank Bills/BBSW 90 days⁵ plus 275-325 bps p.a. net through the cycle², which it has done since inception.

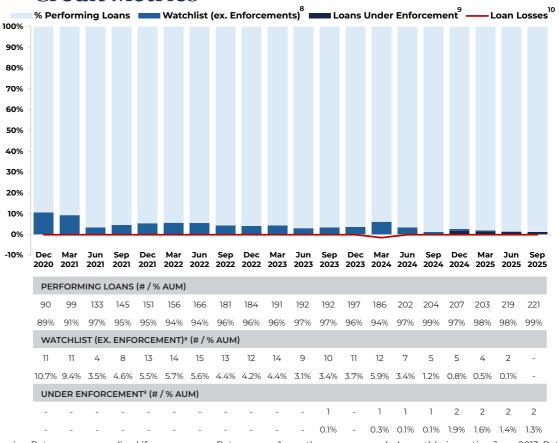

The Fund's loan portfolio was c.54% investment-grade rated at quarter end, which is in line with the Fund's historical range. Most loans are individually around the middle of the credit risk spectrum (BBB to BB rated) with the portfolio weighted average credit rating slightly investment grade, as it has been since inception.

Portfolio Composition⁶

The Fund has been consistently exposed to senior ranking instruments and over recent years has very limited exposure to subordinated debt. While credit quality is also very important, position in the capital structure is typically an important protection for lenders. Whilst the Fund may invest in subordinated loans from time to time, the Fund is expected to maintain its senior ranking profile.

(2) This is a target and may not be achieved. (3) Past performance is not a reliable indicator of future performance. (4) Returns are annualised if over one year. Returns over 1 month are compounded monthly, inception June 2013. Returns are post all Investment Management Fees, expenses and GST. Returns do not incorporate fee rebates and as such actual individual investor returns will differ from fund returns. Returns may not reflect all transactional costs (such as buy/sell spreads). CYTD returns are not compounded. (5) As at the 30 September 2025 the RBA Cash Rate was 360 bps p.a. (6) Exposures measured as a % of AUM, where AUM includes loan committeed capital available for investments such as cash and committeed capital available for investments. (7) Rated by Metrics including where not rated by public rating agencies, weighted average credit quality includes debt investments only. (8) Represents loans in respect of which the applicable lender has commenced enforcement of security granted in respect of which the lender has completed a restructuring by way of enforcement with the existing equity owners which resulted in the applicable lender recovery was less than invested capital. (18) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also ranks loans under a 1-5 scale of risk. These rankings are defined as follows: 1 - Loans performing but below expectations, with no concerns identified, 2 - Loans performing but with a higher likelihood of near-term issues in the next, 5 below to the right and the performance with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. Any loan ranked as a 4 or 5 will be assigned as a Watchlist loan and disclosed as such in this report.

(8) Represents loans in respect of which the applicable lender has commenced enforcement or agreement with the existing equity owners which resulted in the applicable lender's exit from the loan asset. (10) Realised credit losses where recovery was less than invested capital. (17) Calculated as the interest amount overdue divided by AUM. (18) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also ranks loans under a 1-5 scale of risk. These rankings are defined as follows: 1 - Loans performing but with no concerns identified, 2 - Loans performing but below expectations against the Metrics Base Case, 3 - Loans performing but with a higher likelihood of near-term issues in the next 6 months, 4 - Loans with an active covenant breach, payment default, or other significant issues negatively impacting the borrower's ability to service its debt obligations across the capital stack, 5 - Loans that are non-performing or in a distressed state with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. Any loan ranked as a 4 or 5 will be assigned as a Watchlist loan and disclosed as such in this report.

MCP Secured Private Debt Fund II

The MCP Secured Private Debt Fund II (**SPDFII**) is an unregistered open-ended unit trust that invests in a portfolio of Australian corporate debt across mid-market corporate borrowers. SPDFII offers investors direct exposure to Australia's bank dominated corporate lending market by providing loans to predominantly sub-investment grade mid-market corporate borrowers. Net income is distributed monthly¹. SPDFII seeks to deliver the minimum hurdle return of the benchmark (Bank Bills/BBSW 90 days) plus credit margin (+400 bps p.a. net)² while adhering to fund parameters. Inception of the Fund was October 2017.

(1) The payment of monthly cash income is a goal of the Fund only and neither the Manager nor the Trustee provide any representation or warranty (either express or implied) in relation to the payment of any income. (2) This is a target and may not be achieved. (3) Past performance is not a reliable indicator of future performance. (4) Returns (Net and Distribution Returns) are based on NAV unit price. Returns over 1 month are compounded monthly, inception October 2017. Returns are post all Investment Management Fees, expenses and GST. Returns do not incorporate fee rebates and as such actual individual investor returns will differ from fund returns. Returns are not compounded.

MCP Secured Private Debt Fund II

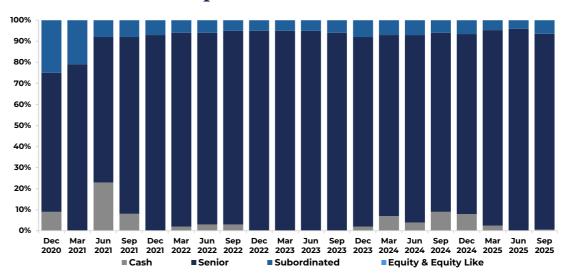

On a net basis, Fund returns 2.12% over the quarter, against a benchmark (3M BBSW) return of 0.92%. Although the RBA cut the Cash Rate⁵ by 25 basis points (bps), other key portfolio investment settings of the Fund remained unchanged. The fund has continued to outperform its hurdle return of the 3M BBSW plus 400 bps through the cycle², which it has done since inception.

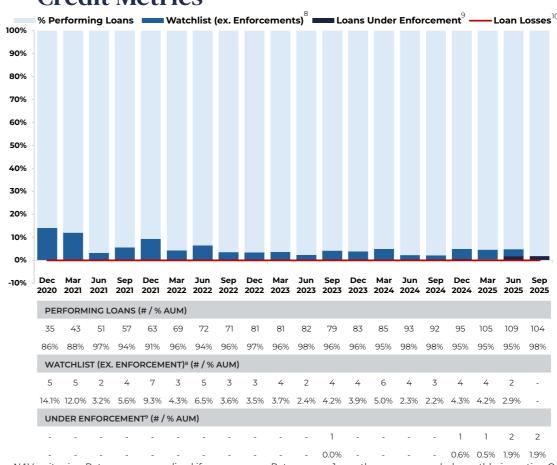

The Fund's loan portfolio was c.26% investment-grade rated at quarter end, consistent with the historical range. Most loans are in the BB range and the weighted average of the portfolio has remained in the BB or BB+ since inception.

Portfolio Composition⁶

The Fund has been consistently exposed to senior ranking, secured instruments and over recent years has very limited exposure to subordinated debt. While credit quality is also very important, position in the capital structure is typically an important protection for lenders. Whilst the fund may invest in subordinated loans from time to time, the Fund is expected to maintain its senior ranking profile.

(8) Represents loans in respect of which the applicable lender has commenced enforcement of security granted in respect of that loan. (9) Represents loans in respect of which the lender has completed a restructuring by way of enforcement or agreement with the existing equity owners which resulted in the applicable lender's exit from the loan asset. (10) Realised credit losses where recovery was less than invested capital. (16) Leverage Ratio (Net Debt/EBITDA) applies to Corporate loans based on most recent certificate provided by the applicable borrower setting out compliance with financial covenants, Loan to Value Ratio (LTV) applies to loans backed by CRE and are calculated based on an independent valuation using either an 'on completion' market value for assets under construction or an 'as-is' value for assets not under construction. For certain CRE loans which are providing funding for only a limited scope of the development programme, known as "Early Works", Metrics measures the LTV on these loans based on the 'as-is' valuation plus construction costs expended as verified by an independent certifier. (17) Calculated as the interest amount overdue divided by AUM. (18) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also noncerns identified, 2 - Loans performing but below expectations, with no concerns identified, 2 - Loans performing but below expectations, against the Metrics Base Case, 3 - Loans performing but with a higher likelihood of near-term issues in the next 6 months, 4 - Loans with an active covenant breach, payment default, or other significant issues negatively impacting the borrower's ability to service its debt obligations across the capital stack, 5 - Loans that are non-performing or in a distressed state with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. Any loan ranked as a 4 or 5 will be assigned as a Watchlist loan and disclosed as such in this report.

The MCP Real Estate Debt Fund (**REDF**) is an unregistered open-ended unit trust that invests in a portfolio of Australian Commercial Real Estate (CRE) loans. REDF offers investors direct exposure to Australia's bank dominated CRE loan market by lending to Australian CRE borrowers and projects including office, retail, industrial, residential development and specialised real estate assets (hotels, healthcare, etc). Net income is distributed monthly¹. REDF seeks to deliver the minimum hurdle return of the benchmark (Bank Bills/BBSW 90 days) plus credit margin (+500 bps p.a. net)² while adhering to fund parameters. REDF has an Issuer Rating of A- from S&P. Inception of the Fund was October 2017.

(1) The payment of monthly cash income is a goal of the Trust only and neither the Manager nor the Trustee provide any representation or warranty (either express or implied) in relation to the payment of any income. (2) This is a target and may not be achieved. (3) Past performance is not a reliable indicator of future performance. (4) Returns (Net and Distribution Returns) are based on NAV unit price. Returns over 1 month are compounded monthly, inception October 2017. Returns are post all Investment Management Fees, expenses and GST. Returns do not incorporate fee rebates and as such actual individual investor returns will differ from fund returns. Returns are not compounded.

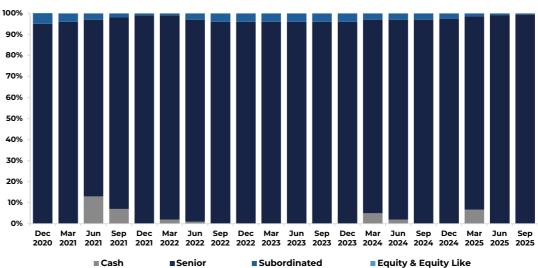

The Fund returned 2.65% (net) over the quarter and 11.11% over the last twelve-months. To date, the Fund has achieved a 1-yr net return spread of 7.01% p.a. and 6.85% p.a. since inception. Although the RBA Cash Rate 5 cut by 25 basis points (bps), other key portfolio investment settings remained largely unchanged through the quarter. The Fund has continued to outperform its hurdle return of the 3M BBSW plus 500 bps through the cycle 2 , which it has done since inception.

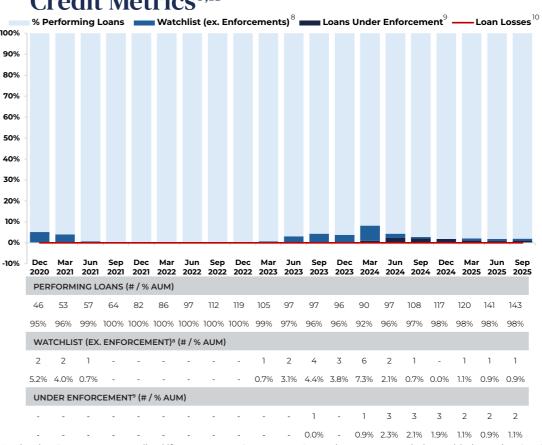

The Fund's loan portfolio is diversified principally by borrower, but also sponsor and geography. Metrics lends to large, high quality partners and strategically target residential (build to sell projects) and industrial developments, which are supported by strong demand (Australia's growing urban population underpinned by immigration (metro residential) and broad economic growth and logistics / e-economy (metro industrial)). We have avoided significant exposures to commercial office, retail, student accommodation or other specialised assets where market depth or alternative use of the asset might be weak. Almost all Metrics lending is in metropolitan areas.

Portfolio Composition⁶

The Fund has been consistently exposed to senior ranking instruments and has very limited exposure to subordinated debt. While credit quality is also very important, position in the capital structure is typically an important protection for lenders. Whilst the fund may invest in subordinated loans from time to time, the Fund is expected to maintain its senior ranking profile.

Credit Metrics^{6,18}

(2) This is a target and may not be achieved. (3) Past performance is not a reliable indicator of future performance. (4) Returns are post all Investment Management Fees, expenses and GST. Returns do not incorporate fee rebates and as such actual individual investor returns will differ from fund returns. Returns may not reflect all transactional costs (such as buy/sell spreads). CYTD returns are not compounded. (5) As at the 30 September 2025 the RBA Cash Rate was 360 bps p.a. (6) Exposures measured as a % of AUM, where AUM includes loan commitments and other investments such as cash and committed capital available for investment. (8) Represents loans in respect of which the applicable lender has completed a restructuring by way of enforcement or agreement with the existing equity owners which resulted in the applicable lender's exit from the loan asset. (10) Realised credit losses where recovery was less than invested capital. (18) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also ranks loans under a 1-5 scale of risk. These rankings are defined as follows: 1 - Loans performing but with a higher likelihood of near-term issues in the next 6 months, 4 - Loans with an active covenant breach, payment default, or other significant issues negatively impacting the borrower's ability to service its debt obligations across the capital stack, 5 - Loans that are non-performing or in a distressed state with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. (6) Exposures measured as a % of AUM, where AUM includes loan commitments and other investments such as cash and committed capital available for investment. (7) Rated by Metrics including where not rated by public rating agencies, weighted average credit quality includes debt investments only. (11) Cash represents capital available for new investment. (15) Carrying value as a % of par value or invested capital, expressed as a % of the loan portfolio. This breakdown includes loans held on a mark-to-market basis and loans held on an amortised cost basis and tested for impairment depending on the fund's valuation policy. (16) Leverage Ratio (Net Debt/EBITDA) applies to Corporate loans based on most recent certificate provided by the applicable borrower setting out compliance with financial covenants, Loan to Value Ratio (LTV) applies to loans backed by CRE and are calculated based on an independent valuation using either an 'on completion' market value for assets under construction. For certain CRE loans which are providing funding for only a limited scope of the development programme, known as "Early Works", Metrics measures the LTV on these loans based on the 'as-is' valuation plus construction costs expended as verified by an independent certifier.

(8) Represents loans in respect of which the applicable lender has commenced enforcement or agreement with the existing equity owners which resulted in the applicable lender's exit from the loan asset. (10) Realised credit losses where recovery was less than invested capital. (17) Calculated as the interest amount overdue divided by AUM. (18) In addition to rating all debt investments in line with S&P methodology, to enhance its portfolio monitoring capability Metrics also ranks loans under a 1-5 scale of risk. These rankings are defined as follows: 1 - Loans performing but with no concerns identified, 2 - Loans performing but below expectations against the Metrics Base Case, 3 - Loans performing but with a higher likelihood of near-term issues in the next 6 months, 4 - Loans with an active covenant breach, payment default, or other significant issues negatively impacting the borrower's ability to service its debt obligations across the capital stack, 5 - Loans that are non-performing or in a distressed state with lenders exercising rights or control actions, loans that may be impaired with a credit loss possible. Any loan ranked as a 4 or 5 will be assigned as a Watchlist loan and disclosed as such in this report.

While the Report seeks to provide detailed information in respect of MDIF's and the Wholesale Funds' investment to note that investments in corporate loans are private and confidential transactions between the borrower and the Wholesale Funds, accordingly the Report does not identify individual investments.

All assets held by the Wholesale Funds are valued each business day and that any movement in the carrying value of those assets (including any impairment) is reflected in the daily net asset value (NAV) of the Wholesale Funds and as a result in MDIF's NAV which is published daily at www.metrics.com.au/mdif. An international accounting and professional services firm has been engaged to review the valuation of the underlying loan assets held by the Wholesale Funds on a monthly basis and to ensure that the carrying values of those assets are adjusted if there is evidence that indicates that an asset is impaired or overvalued. MDIF's NAV is separately audited/reviewed by the Fund's independent auditors at each reporting date.
